

## 380+ Custom Dragon Commands for Dolphin SuperNova Magnifier & Screen Reader Edition

### Details

Dragon by default does not provide you with voice commands to carry out most of the SuperNova Magnifier & Screen Reader Edition functions and as such you will find that you are limited to the built-in menu and key press Dragon commands.

The following Dragon commands have been created by DragonSpeechTips (DST) to provide a wealth of additional voice commands that can be dictated when using SuperNova Magnifier & Screen Reader Edition.

### File functions

Command(s) you can say	Description
show supernova control panel supernova control panel show supernova	Shows/reveals the SuperNova control panel. The SuperNova application must be already running.

### Note:

Dragon generic, menu, keyboard and mouse commands are available for use in Dolphin Supernova and at times should be used with these custom commands.

When performing dictation, the "Dictation Box" may appear and the use of commands such as "Click Transfer" and "Click Cancel" work in the normal way.

For a list of useful Dragon generic commands visit:

<https://dragonspeechtips.com/dragon-generic-keyboard-and-mouse-commands/>
