# **D**ragonSpeechTips

# **255**<sup>+</sup> Custom Dragon Commands for Evernote version 6

#### **Details**

Dragon by default does not provide you with voice commands to carry out most of the Evernote functions and as such you will find that you are limited to the built-in menu and key press Dragon commands.

The following Dragon commands have been created by DragonSpeechTips (DST) to provide a wealth of additional voice commands that can be dictated when using Evernote.

#### Global commands (Global commands can be used at any time; Evernote does not need to be the active window)

Command(s) you can say	Description
create a new evernote note create a new note in evernote create a new note create new evernote open new evernote	Creates/Opens a new Evernote note window.
find in evernote	Starts a new Evernote search.

show word and resources counts show word and resources stats	Opens the Word and Resource Counts window. Displays word count, paragraph numbers etc.

#### Note:

Dragon generic, menu, keyboard and mouse commands are available for use in Evernote and at times should be used with these custom commands.

For example, when the Evernote left pane is in focus, commands such as "press down arrow" and "press right arrow" can be used to navigate between the Stacks and reveal/hide any Notebooks within Stacks. To select a Notebook, use the generic command "Press Enter".

When performing dictation, the "Dictation Box" may at times appear and the use of commands such as "Click Transfer" and "Click Cancel" work in the normal way.
